

# FOREIGN TRADE ZONE

Our Solutions...Your Success

## GTK Foreign Trade Zone Product Features

GTKconnect FTZ software solution aims to automate your zone related data management and transactions to the maximum possible extent by not only reconciling with your inventory BoM data, but also by integrating with your other systems and your partners to reduce data entry.

**Some salient features of GTKconnect FTZ software are:**

- Ability to integrate your BoM data or your inventory consumption data to track inventory and avoid manual entry and reconciliation
- Inventory reconciliation with your system on a daily basis
- High level of flexibility to accommodate your complex manufacturing processes and its use of inventory towards products including exports, domestic, and ancillaries.
- High level of flexibility to integrate with your existing systems and unique identifiers for your parts data to automate what falls within the zone purview.
- Ability to do weekly estimate tracking, anti-dumping tracking and combined NAFTA entries
- Comprehensive audit trail
- Unified web browser user interface and platform provides the ability to manage all zone operations for a either single site or multiple subzones, as well as multiple customers in a general purpose zone or any combination
- Automatically populate Advanced Shipment Notification (ASN) data by integrating with your partners including carriers, freight forwarders, vessel operators etc.
- Integration with your CHB
- Ability to do individual and weekly Entries (CBPF 3461 and CBPF 7501)
- Ability to generate annual CBP Reconciliation Reports and FTZ Board Report
- Generate Quarterly Harbor Maintenance Fee Data Report
- Supports CBPF 7512 (in-bond documentation) and QP/WP transmissions
- Provides the ability to generate other custom reports
- Direct submission of e-214
- Direct submission of QP/WP (electronic in-bond transactions)
- ABI and ACE approved

- Provides for all CBP and FTZ requirements including receipts, adjustments, and shipments from the Zone
- System tasks to ensure the user does not miss CBP or FTZ Board deadlines or submission dates
- Supports warehousing related receiving, manipulation, manufacturing, consolidation, and distribution of inventory.
