

TRADE AGREEMENTS

OUR SOLUTIONS....YOUR SUCCESS

GTK Trade Agreements Product Features

Trade Agreements eliminates import quotas, tariffs and preferences on most goods and services traded between countries. Companies require managing and maintaining updated Trade Agreement rules of origin which is done manually. GTKonnect focuses on managing the entire Trade Agreements lifecycle by reducing existing trade barriers by managing multiple Trade Agreement programmes in one automated integrated system.

Some salient features of GTKonnect Trade Agreement software are:

- Qualify BOM against multiple Trade Agreements in one integrated system
- Access up-to date Trade Agreement rules of origin
- Storage and retention of BOM analysis results
- Publish Trade Agreements certificates to customers, track changes to product Trade Agreements status and amend / reversion new certificates as required
- Allow customer to create a request for a certificate and track the request through completion within the system

- Identifying which products may be eligible for preferential duty treatment under existing Trade Agreements's
- Managing the solicitation of suppliers to determine the origin of their products
- Validating supplier certificates for products under Trade Agreements
- Global expansion of Trade Agreements
- Central location for documents
