

DIS - SAVING TREES

Document Imaging System

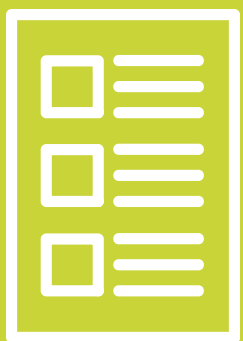

Being able to send docs for review to US customs is not only a time-saving process but also reduces paper and saves a tree.

Customs sends a doc request by email, phone or direct transmission to the entry.

The user can send docs directly from the import image repository or uses our standalone module to add docs and transmit.

Once docs are sent; Customs sends an acknowledgment message. Messages are loaded to the DIS transaction and the import entry.

Simple and easy to use! Save a tree and use DIS to manage all your customs document requests.
