

ISF

ISF 10+2

1

MASTER DATA

Master Data contains all the attributes and parties to help minimize reentry of data.

2

PARTIES

Manufacturers, Selling party, Consolidator, Stuffing location can all be created from the same screen through a single data entry.

3

HTS AND CO DATA

HTS and Country of Origin data are stored for reference and validation.

4

PARTS DATABASE

Parts database provides the ability to maintain the company's products with their specific attributes.

5

PROCESSING

Process ISF's from any country at any time, in your lowest cost environment. Visibility and control still remain with US operations where the POA resides.

6

TEMPLATES/COPY

Use predefined templates or copy previous transactions to increase efficiencies.

7

GET FANCY

If you really want to get fancy look at integration opportunities with your ERP or with our Pre-entry module and validation/audit tools.

8

PROOF IS IN THE PUDDING

8 of the 10 data required elements can be completed with just three mouse clicks.

9

DASHBOARDS - MANAGE AND CONTROL

Manage the process through interactive dashboards tuned to your business rules.

10

CUSTOMER SERVICE

Need help or have an issue - support is only a click away. We have resources at your call 24 hrs a day.
